

POSTDOCTORAL POSITION

Harvard Medical School/Brigham and Women's
Hospital, Boston, MA

Tumor Virology Kaposi's Sarcoma Herpesvirus

The Kaye Laboratory at Brigham and Women's Hospital/Harvard Medical School has a postdoctoral position available. The laboratory investigates the cancer virus Kaposi's sarcoma herpesvirus (KSHV or human herpesvirus 8) using a combination of approaches in molecular biology, biochemistry, cell biology, genome wide screens, and bioinformatics. Projects available including in viral persistence, epigenetics, DNA damage response, genome wide screens. A strong background in molecular biology or biochemistry is preferred. Experience with bioinformatics is helpful.
