

A NIH-funded postdoctoral fellow position is available in the laboratory of Mario Feldman, PhD, at the Department of Molecular Microbiology, Washington University School of Medicine in St Louis, Missouri, USA. The Feldman lab investigates the virulence and survival mechanisms of the opportunistic pathogen *Acinetobacter baumannii*. The successful candidate will be driving research into the molecular mechanisms that govern protein secretion and cell surface organization in this pathogen.

Select publicationx from the lab are:

Harding et al., Nature Microbiology Reviews, 2018
Kinsella et al, JBC 2017
Weber et al, mBio 2016
Harding et al, PLoS Pathogens, 2016
Weber et al, PNAS 2016
Iwashkiw et al, PLoS Pathogens, 2012

Candidates are required to have obtained a Ph.D. in microbiology, biochemistry, genetics, or related disciplines within the last four years. Excellent communication skills in English and recent first-author publications in well-recognized journals on related topics are required. A competitive salary along with a benefits package will be offered. The initial appointment will be for 12 months. Additional 12-month extensions will be available based on performance and/or availability of funds.

You will be working in a highly-productive, well-funded, vibrant, interactive, friendly and intellectually stimulating research group. For more information check the lab webpage at <http://feldmanlab.wustl.edu/>.

To apply, please send a cover letter with a brief summary of research experience and interests, CV, the contact information for 3 referees.
