

University of Michigan – Ann Arbor, USA Chemical Engineering, Lin Lab

Postdoctoral Research Fellow
Mentor: Xiaoxia “Nina” Lin, PhD
Start Date: ASAP

The Lin Research Group in the Department of Chemical Engineering at the **University of Michigan – Ann Arbor** is seeking a postdoctoral fellow.

- The fellow will work on a federally funded project of developing a generalizable technology platform, based on modular synthetic microbial consortia, for sustainable production of biofuels/bioproducts using atmospheric carbon dioxide and nitrogen.
- The candidate will have completed, or be close to completing, a Ph.D. degree in chemical/biological engineering, microbiology, biochemistry, or another related field.
- The ideal candidate will be a highly motivated individual who wants to drive their own research project while working closely with both internal and external collaborators.

The candidate will join a dynamic research group located at the North Campus Research Complex (NCRC) of the University of Michigan. Our group, and the Department as a whole, strives to provide a stimulating and collaborative research environment for all the trainees and to support their professional advancement.

Interested candidates should submit a cover letter (1 page maximum) outlining their research background and interests, as well as a CV with the contact information for 3 references, to Dr. Xiaoxia “Nina” Lin at ninalin@umich.edu.
